Through a burning desire to tell stories from everyday life and all things that feel incomprehensibly big, Trio Rop grounds itself in traditional storytelling and Swedish folksong. This tradition was historically used as a way of sharing and remembering stories and events. In this spirit, Trio Rop seeks to make visible the stories they themselves miss in the Swedish folk tradition. The tales of the outsiders, of queer love and the power of friendship. With their innovative compositions, vocalists Elin Buxfeldt, Petrix Hessel and Sofia Källman take us to a tranquil place full of shimmering light and beautiful shadows.

Trio Rop was formed in the south of Sweden in 2016 and has released multiple singles and an EP – Hon kisar mot mig. Their debut album Mellan oss is recorded by Klara Goliger at the studio Music A Matic in the fall of 2021 and is released 20.05.22. On the album, the trio is joined by six other voices.

Between us, everything and nothing exists. Between us, the future is built. Between us is siblinghood, is grief, is love, cries, whispers. It all lives between us.
